

FATHERHOOD

TECHNICAL SPECIFICATIONS.

COMPANY:

There is 1 performer and 1 technician. We require 1 dressing room.
We will be travelling in 1 vehicle and require parking for this for the duration.
The performance is approx 75 mins with no interval.

LIGHTING:

Please see attached LX plan.
We have the show file saved as an *esf* file for use on ETC desks.
We also have a Nomad gadget for those venues without.
We tour colour gel but if we can use yours it saves time on the get-out.
We tour some LED floods as floor lights.

SOUND:

Sound is from a Mac mini. We will connect to your house P.A. via a 3.5mm headphone mini-jack.
It would be nice to have 2 onstage monitors but this is not essential.

PROJECTION:

Projection is also from the Mac mini - preferably via HDMI but we have adaptors for VGA.
We tour a 4M wide Fastfold projection screen.
If you have a projector available we would like to use that.

SET:

There is no fixed set.
There are 2 chairs and a table and a roll of paper which rolls out from the wings.

STAGING:

We require a black box stage.
